Nearby DC Neighborhoods Experiencing Nighttime Residential Home Break-Ins

Entry is typically made through a broken rear window or door

The Metropolitan Police Department's Second District is investigating several recent late evening/nighttime residential break-ins in which the unknown suspect(s) make entry by breaking a rear window pane.

The Village Police Department advises residents to keep all exterior lights on both front and rear throughout the night, to keep all windows and doors locked, to activate security systems, and to call 9-1-1 if awakened by the sound of breaking glass.
